ABSTRACT

During a two-year period, 1979-80, the National Congress on Church-Related Colleges and Universities operated as a cooperative effort of 23 denominations to examine the issues facing their institutions of higher education. The significant papers and a record of events appear in this and three other volumes. This volume contains information of two kinds: first, an extensive bibliography of recent books and published articles about church-related higher education, and second, a bibliography of materials available through denominations and church-related colleges. In each bibliography materials are divided into 18 subject sections: nature and mission; future; governance; sponsoring religious body; college/university-church relations; administration/management; institutional research and planning; faculty; Christian community on campus; Christian formation/campus ministry; students; academic freedom; curricula/academic programs (content and methodology); relations (general, laws, regulations, and court decisions); relations/service to specific groups; new organizational directions; alumni; and history. Preface

One of the central ideas of the two year program of the National Congress on Church-Related Colleges and Universities, involving the cooperation of 23 denominations, was the facing of issues and the sharing of ideas. Early in the planning it became apparent there were many ideas and materials that should be shared. Thus this Volume IV, *Exchange – Sharing Resources for Renewal*, is a result of two main forces.

The first was a project initiated in 1978 by the Association of Catholic Colleges and Universities (ACCU) under the leadership of Msgr. John F. Murphy securing Sister Marian Brady, S.P. to compile a bibliography on Catholic/Church-Related Higher Education – 1968-1978. The second was the appointment of a sub-committee of the National Congress composed of Sister Jeanne Knoerle, S.P., a member of the Board of Directors, and Dr. Donald A. Courtney, the Denominational Liaison Officer for the Church of God, to supervise the Resource and Information Exchange program at the Notre Dame meeting in June 1979. This program not only collected examples of activities and programs of colleges but indexed them as an example of the sharing that could take place. The draft of the Catholic bibliography was shared, and the usefulness of the index of activities and programs and the bibliography was recognized. The decision was made to combine these two efforts and to promote the collection of both bibliography material and activity material to become this Volume IV, *Exchange*. This was continued to be promoted by the sub-committee of Sister Jeanne and Dr. Courtney under the editorship of Sister Marian Brady.

It should be recognized that the Denominational Liaison Officers (DLO's) promoted and solicited entries from their own members, offices, and colleges and forwarded these to Sister Marian for selection and classification.

Special acknowledgment is due to the Denominational Liaison Officers who solicited information from their denomination offices and their colleges and universities for both parts of this work, especially to the following and their colleagues who assisted them: Charles R. Bruning (American Lutheran Church), George E. Capps, Jr. (Southern Baptist Convention), Donald A. Courtney (Church of God), D. Duane Cummins (Christian Church (Disciples of Christ)), Rod Fulcher (Presbyterian Church in the United States) and James Hutchinson Smylie and Arthur Dicken Thomas, Jr. who prepared the PCUS bibliography, F.E.J. Harder (Seventh-day Adventists), Albert J. Meyer (Mennonite

Church) and Don Garber who prepared the Mennonite bibliography, Msgr. John F. Murphy and Sister Alice Gallin, OSU (Association of Catholic Colleges and Universities), both of whom fostered and encouraged the development of the Bibliography in its origination, and James A. Smith (United Church of Christ). Acknowledgment is also due to all the persons in individual church-related colleges and universities who responded to the request and searched their campuses for pertinent materials which they submitted and to all those persons in denominational offices and educational organizations who provided information, especially Victor Hahn of the Lutheran Educational Conference of North America.

It must be recognized, however, that this publication is the primary work of its editor, Sister Marian Brady, S.P. It could not have been done without her dedicated, patient, and thorough work. The entire National Congress program is indebted to Sister Marian for making this important resource available to Christian higher education.

Gratitude is also due to Sister Jeanne Knoerle, S.P. and Dr. Donald Courtney who initiated and shaped the Information Activities project in its early development, to Barbara Ater and Katy Ollett who indexed the first materials, to Julia Richmond for her handling of the publication, and to Sister Lourdes Kline, S.P. who patiently assisted in processing and typing the materials.

INTRODUCTION

For the two-year period 1978-1980 the National Congress on Church-Related Colleges and Universities has been a cooperative effort of twenty-three denominations to examine the issues facing their institutions of higher education. Literally hundreds of people have been involved – nationally recognized church leaders and educational scholars, denominational executives and college officials, lay members of congregations and constituents of colleges, and many others representing a cross-section of those concerned about church-related colleges and universities.

The participants have faced their task in a variety of ways. They have held two national meetings, one at the University of Notre Dame in June 1979 and one in Washington, D.C. in February 1980. They have worked through Study Commissions to address particular issues in depth. And they have, through their individual denominations, designed plans of action to reach out to the broad spectrum of church members and constituents of church-related colleges and universities.

To capture the substance of all the work carried out during the last two years, the National Congress is issuing a set of publications – *Church and College: A Vital Partnership* – containing the significant papers and a record of events. There are four volumes in this series of publications.

1. *AFFIRMATION – A Shared Commitment for Creative Renewal.* This volume is a summary of the main work thrust of the National Congress. It contains Affirmations about the value and contribution of the church-related college, Action Plans to renew the colleges' ability to face the issues of the future, and an Inventory for Renewal to help colleges and churches alike continually assess their status. This volume also contains a brief description of all National Congress activities and processes, including excerpts from speeches at the two national meetings.

2. *MISSION – A Shared Vision of Educational Purpose.*

3. *ACCOUNTABILITY – Keeping Faith with One Another.* These two companion volumes contain the papers developed by the six Study Commissions of the National Congress. The papers cover the six areas of educational purposes and

programs, issues of society, relationships between churches and colleges, legal issues, public policy issues, and financial issues. In each area the papers attempt to define the issues and to identify options for churches and colleges to deal with the issues. Also, an overview statement appears at the first of Volume 2. It describes the general framework of church-related colleges and is the base from which the Study Commissions delved into their areas of specific issues. Having the overview eliminated the need for each Commission to repeat basic conditions and provided a common predicate from which all began their work.

These papers are significant in themselves, but they have also served other useful functions for the National Congress. For the Notre Dame meeting, they were the basis of discussion sessions and the means to acquaint many individuals with the issues concerning church-related colleges. For the Washington meeting, they were the primary resource from which the meeting's documents were drawn – the Affirmations, Action Plans, and Inventory for Renewal. Through the development and discussion of the Affirmations, Action Plans, and Inventory, the National Congress synthesized the papers of all six Commissions and brought focus to its overall work. That kind of integrating statement would not have been possible, however, without the original sources to draw upon.

4. *EXCHANGE – Sharing Resources for Renewal.* This volume contains information of two kinds: first, a bibliography of recent books and published articles about church-related higher education, and second, a bibliography of materials on church-related higher education available through denominations and colleges. This volume is perhaps the most extensive bibliography on church-related higher education.

The participants in the National Congress on Church-Related Colleges and Universities hope that these publications are both a contribution to the study of higher education and a resource that helps church-related colleges and college-related churches face the future with vitality and purposefulness.

It may be useful to explain in more detail the approach, the two parts, and the use of this Volume IV, *Exchange*.

The 18 categories which organize the entries were developed for the bibliography from the nature of the entries themselves and approved by the Executive Committee for both parts of this volume. The entries listed in each category are not mutually exclusive in all cases. In a few instances in Part I "Bibliography" an entry is repeated. In Part II "Activities" there is no multiple listing, as other categories are obvious in the annotation.

The "Bibliography" is as comprehensive as possible, listing entries published between 1968 and 1978, guided by the norm that the content of books and articles listed would be specifically about church-related higher education. A few entries published in 1979 have been included because of their timely usefulness. We are well aware that useful materials not listed exist in many college and university publications but are not listed in indexes available in libraries. Encyclopedia articles have not been included although these are a useful source of information.

The "Activities" section is not comprehensive. "Activities" is used in the broad sense to include programs, projects, activities, policies, procedures, and materials which spring from and/or promote the church-related mission of the college or university. Entries have been chosen to represent the diversity as well as the unity of church-related activities on the part of denominations and their colleges and universities. "Activities" offers those concerned about the renewal of church-related higher education a variety of rich resources which can spark ideas for further creativity in fulfilling the mission of institutions which vary in size, location, students, and surrounding community. The source of further information concerning each activity is indicated in the entry.

To make the sources cited in this bibliography accessible, information has been included to assist the user in obtaining them should they not be available in libraries. Some entries include the required information. Others are coded in brackets at the end of each entry as follows:

1. A number in the brackets, e.g. [#3], indicates that the full listing of the periodical or book is given in Category #3 (Governance) of this bibliography.
2. Letters in the brackets, e.g., [EI], refer to the following list which indicates where complete information about the periodical or book may be obtained, i.e., *Education Index*. In some instances, the key indicates where the source itself, or a copy of it, can be obtained.

College and university publications can be obtained from these institutions. INSTITUTIONAL RESEARCH, PLANNING

54. AUGUSTANA PLANNING MODEL

Augustana College has begun to use a new formal planning process based upon the idea that a clear and comprehensive statement of the aims of the institution, when combined with a frank assessment of current conditions, determines what emphases the institution ought to have in the future. In the model being used the statements of aims are arranged in a strict hierarchy, with the broad institutional mission at the top and an increasingly specific set of statements down through the individual operating unit's goals at the other end.

The process being used is one in which the annual goals originate at the lowest levels and are aggregated and coordinated as they assemble into an institutional statement for a three-year period, complete with lists of activities and budgets, and with annual assessments being both the end of one planning cycle and the beginning of the next. The presumption is that if each unit makes a series of step-wise improvements consistent with broader purposes, the institution inevitably moves closer to the accomplishment of its mission.

Dr. Chester B. Whitney, Vice President for Finance and Planning, Augustana College, Sioux Falls, SD 57105.

Under the direction of a faculty coordinator, twenty academic areas will be examined in a series of ten seminars per year for two academic years. The paper will be discussed by the respective department, by the authors of the other nine departmental papers for that year, and by all other interested faculty. After final revisions each paper will be duplicated and distributed to the faculty and to appropriate staff.

The program coordinator will present an oral summary to the entire faculty at the completion of every five papers, and will prepare a written report with evaluative commentary at the end of each academic year to the funding agency, faculty, staff, and the Board of Directors.

These chapel periods are a structured *opportunity* for more frequent and avowed Christian witness. In addition to the four 20 minute chapel periods, once each week a 90 minute block of time has been reserved for community use. 103. CHRISTIANITY AND CIVILIZATION

This is an interdisciplinary general education program which seeks to integrate the humanities with the Christian perspective, focusing on the heritage of man in its cultural manifestations as understood by the Christian faith.

Dr. Albert N. Keim, Vice President for Academic Affairs, Eastern Mennonite College, Harrisonburg, VA 22801. Tel. (703) 433-2771.

104. FOUNDATION STUDIES PROGRAM

This is a general education program of four integrated courses covering knowledge the College considers helpful in becoming a

productive person in the community and, more importantly, a useful Kingdom member. As Jesus grew in wisdom, stature, and in favor with God and people, so a prime goal of Foundation Studies is to provide intellectual, physical, spiritual and social growth. The program stresses basic concepts and ideas more than hard facts; e.g., ecological issues take precedence over specific date and scientific terms. Students are challenged to apply the learning to their everyday lives. Biblical truth is not just identified, classified, and stored; it becomes a value from which decisions are made and lives changed.

Academic Dean, Hesston College, Hesston, KS 67072.

105. THE HUMAN EXPERIENCE

An interdisciplinary study of the ways in which different prescientific cultures have dealt with certain basic human questions such as the nature of human existence, the relation of human beings to time and history, to the natural and supernatural worlds, and the relation of man and woman; of the ways these cultures have structured and explained human society. Material is drawn from the literature, oral tradition, art, religion, philosophy, and social writings of primitive and ancient societies and the great civilizations of Asia, Africa, and the Western World.

These courses reflect the conviction expressed in Ohio Dominican's mission statement that truth is dynamic, an infinite realm in which the person grows . . . through progressive realization of the significance of old truths and progressive attainment of new truths. Truth can be found in all cultures and traditions, in the whole range of the arts and sciences, and, in a special way, in religious faith and mankind's theological reflection on faith. The humanities program is designed to begin the lifelong exploration of these dimensions of truth.

Ronald W. Carstens, Director of the Humanities Program, Ohio Dominican College, 1216 Sunbury Road, Columbus, OH 43219. Tel. (614) 253-2741.

It is presumed that students in this program will apply for the College's Honor Program in junior and senior year.
